

DISCOVER YOUR POTENTIAL

You can't de-risk what you can't see

Most companies waste 30% more or more on utilities. Utility decisions are often siloed and managed by different departments. The result is process inefficiencies, lack of control, and overspending on utilities instead of more investment in the company's core business.

Discover how you can reduce expenses and manage uncertainty of your utility budget. Bring transparency to decision making through an activity-based costing process, connecting consumption to your productivity.

Key Benefits

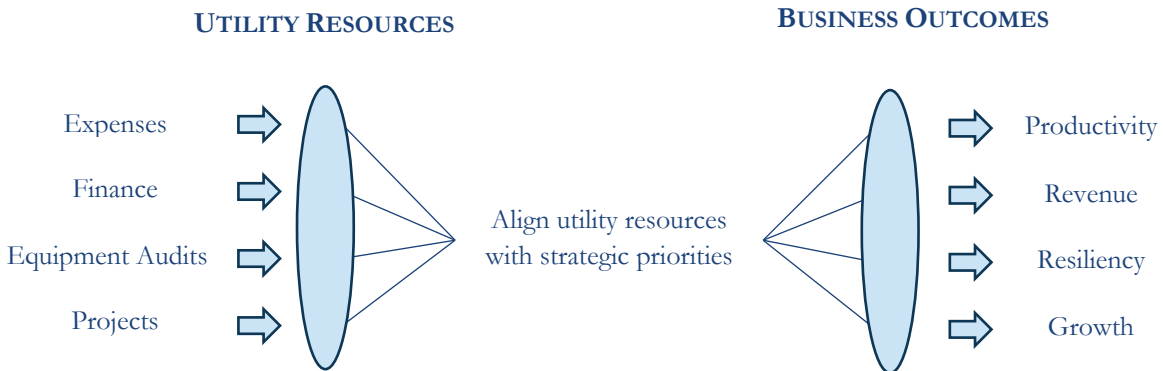

- Clarity of efficiency opportunities to reach your goals
- Alignment between utility expenditure and business needs and mission
- Actionable plan that lets you invest in your business

- About Us
- Introductory Services**
- Managed Services
- Business Solutions

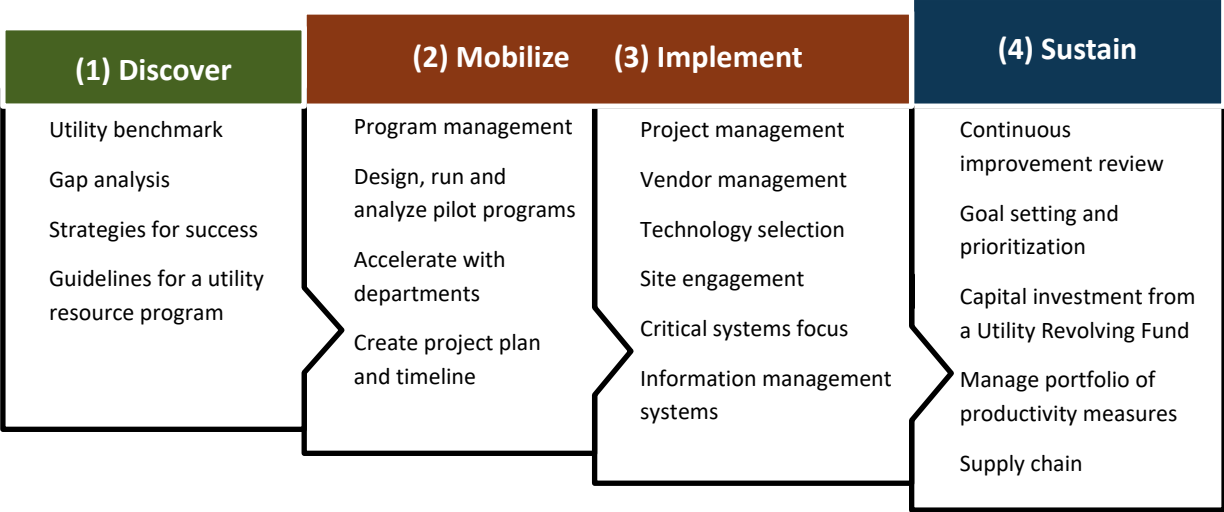

90-DAY DISCOVERY INITIATIVE

Start your engagement by understanding your utility resource consumption and productivity. See the scope and impact of a Utility Resource Management Program. Align your consumption of resources to your business outcomes they provide. At the end of the program, you will have a strategy and guidelines for achieving cost-savings and productivity improvements.

- Key opportunities to reduce costs and support growth
- Best practices to align consumption with business goals
- Requirements and skill sets necessary to move projects to completion
- Engagement with principal stakeholders involved in utility decisions

The Initiative is Workstream 1 of our **Utility Resource Management Framework**. Designed with industry best practices and executed with a continuous cycle of improvements, we will help you achieve your desired results.

Over the 90-day program, we will review your current operations, opportunities, and compare it to industry best-practices. You will receive a comprehensive and prioritized list of action items that improves your productivity. This process includes:

- **Meetings (2)** – A Kickoff Meeting and a Wrapup Meeting.
- **Workshops (2)** – *Strategies for Success* and *Guidelines for a Utility Management Program*.
- **Data Acquisition** – Access to utility data, such as electricity, water, trash, etc.
- **Audits** – Access to existing audits and conduct additional audits as needed.
- **Interviews** – Informational interviews and conversations with key stakeholders.
- **Reports** – Documentation of a Utility Resource Management Plan and its impact.

We look forward to working together with you!
